REPORT

The Students Parliament is the representative body of students, formally engaged in the protection of the rights and interests of all students at the University. Also, the Parliament participates in the implementation of the students initiatives related to improving the teaching quality and scientific research, student standards, and identifying potential companies for the organization of professional training, organizing study tours, meetings and the like. The Students Parliament consists of three students from each year of undergraduate studies, including the representatives of master studies, of all faculties at the University. The elections are annually held each April, by secret and direct voting. The Election Commission ensures the regular procedure of elections, in accordance with the Regulations. It is important to note that the Students Parliament, as the main form of students organization required by the Law on Higher Education, is not associated with other forms of students organizations such as the Students Union and the like, but it coordinates with them to improve students life at the University.

The main obligations of the Students Parliament are:

- Protecting the rights and interests of all students;
- Improving the quality of teaching and improving the conditions of study;
- Participation in the evaluation and control over the quality of teaching, of textbooks, exams, academic staff and students services;
- In addition to the main obligations, the Students Parliament is also responsible for;
- Organization of educational and humanitarian activities;
- Creating and implementation of the projects for study programs;
- Organizing study tours;
- Cooperation with students parliaments of other universities.

The students address the Parliament in order to learn more about the plans, objectives, actions and projects of the Parliament and to be included in their realization. Through their participation in the work of the Students Parliament, the students feel closer to the University and they have an opportunity to make an influence on the change, innovation and effective resolution of potential problems at the University.

The University, on the other hand, receives from the Parliament all relevant information about students’ issues and other potential problems.

Due to the particularly good communication among students’ representatives and the University management, a very good cooperation is achieved allowing students to fully exercise all their rights and interests.
The work of the Parliament stands out through various humanitarian activities which are not closely related to the University. They represent a way to engage students in the welfare of the community.

The Students Parliament delegates its representatives in the bodies such as the University Council and the University Senate, and thus the members participate in decision-making on the issues related to students’ life. The Students Parliament also has its own representatives and actively participates in the work of Quality Control Commission which deals with all the issues related to improving the quality of study at the University, and including an evaluation of the teaching process, academic staff and associates (performing a qualitative and quantitative research and interviewing the students twice during the year).

Also, the Parliament is actively engaged on the promotion and branding of the Singidunum University through all actions and projects in which the Parliament participates.
